

As an Indiana Citizen, I would like to speak out against proceeding with 02-278. It was just a matter of time before a group with as much power as the CBA would try to circumvent our Indiana Do Not Call Law. The Citizens of this State obviously enjoy this law. 3.6 million people signed up on the no call list in a state that has a population of a little less than 6 million people. That was a pretty strong statement from the Citizens of this State that they had heard enough! Tell the Bankers to read our Do Not Call Law!!! Our legislators gave them the ability to call. All they have to do is ask us. I enjoy my privacy at home. I am not sure why someone would not including these same people that want to erode our Do Not Call Law. Please help insure my right of privacy at home in Indiana.
